DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claim 1, at the time the application was filed, the subject matter that the handle is pivotally connected to said positioning apparatus is nowhere found in the specification. The drawings do not indicate that the handle is pivotally connected to the positioning apparatus. According to the drawings, the handle 13 is connected to spring 15, and the spring biases the handle.

Regarding claims 2 and 3, the claims depend from claim 1 and therefore are indefinite.

Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 1, the limitation "apertures" in line 16 makes unclear whether these are other apertures than the several interval positioned apertures recited in line 4, or one of the interval apertures of each tube.

Regarding claims 2 and 3, the claims depend from claim 1 and therefore are indefinite.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. In particular, the limitation "pivotally connected to said positioning apparatus" in claim 1, line 10, and "apertures" in claim 1, line 16, necessitated the new grounds of rejection. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
